Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 14-23 in the reply filed on 29 August 2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Bachelder.

There is disclosed in Bachelder a holder for preparation of a drink, comprising: a container 9 for receiving coffee; a collector (chamber) 12 for collecting drink; a modulator (valve) 6 located downstream of the collector, the modulator including a fluid control member 5, 8, a handle (outer surface) for a user to move the fluid control member and an engagement member (friction fit).

Claims 20, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Jefferson, Jr. et al.

There is disclosed in Jefferson a device for the preparation of a drink, comprising: a container 68 for receiving coffee; a water heating and delivering system 32, 48, 56; a timer (controller) 136 for allowing the delivery of hot water to the container for a predetermined time; a cup modulator (valve) 98c comprising a fluid control

member 102c which defines a flow restrictor, a handle 100c for a user to move the fluid control member and an engagement member 92c.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bachelder in view of Jefferson, Jr. et al.

Jefferson, as discussed above, discloses that it is known in the art to use a flow restrictor as a fluid control member.

It would have been obvious to one skilled in the art to substitute the fluid control member of Bachelder with that taught in Jefferson, in order to provide an alternative means for regulating the flow of brewed beverage from the container.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jefferson, Jr. et al. in view of Bachelder.

Bachelder, as discussed above, discloses that it is known in the art to use a plurality of openings and single fluid opening arrangement as a fluid control member.

It would have been obvious to one skilled in the art to substitute the fluid control member of Jefferson with that taught in Bachelder, in order to provide an alternative means for regulating the flow of brewed beverage from the container.

Allowable Subject Matter

Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Gardiner, Corbier, McLean Jr, et al. and Hoffmann are cited for their disclosure of the state of the art.
